En toda Europa proliferan academias que por primera vez profesionalizan el estudio de la naturaleza. Incluso las universidades abandonan poco a poco sus reticencias. La física, la astronomía o la historia natural se ponen de moda: las clases ociosas de la sociedad las promocionan y cultivan como afición. Entre tanto, se inicia un proceso de secularización y los filósofos entran con frecuencia en conflicto con los teólogos. Los hombres de ciencia, que están en trance de lograr plena independencia, reivindican su autonomía y con frecuencia desconfían del radicalismo de los ideólogos, lo cual no significa que se muestren indiferentes a las grandes preguntas de la existencia. En este volumen se expone la cosmovisión sustentada por los más destacados investigadores de la época.

Luis González y González en su taller de historiador Antonio Saborit,2010-06-09 En una suerte de invitación a la toma de conciencia de la propia importancia, la presente antología de la obra de Luis González y González llama al lector común a mirarse en la historia y a comprender su papel de materia viva y constructora del devenir histórico. A través de la mirada de Antonio Saborit, estudioso apasionado y conocedor comprometido de la obra de González y González, el recorrido por el México de los años revolucionarios se desdobra: no hubo un México, hubo dos, veinte..., tantos como hombres de a pie, aquellos que de pronto se convirtieron en contrapunto de la historia de bronce. Esta antología se publica para recordar al ilustre historiador a diez años de su fallecimiento, acaecido en el año 2003.
