Jacalyn Duffin

Spirit Anthony Head, 2019-03-07 As he lay bleeding in a Vietnamese rice paddy, his right arm shredded by shrapnel, artist Jesse Treviño realized that he wanted to honor and preserve his family and his cultural heritage through his artwork. After receiving a Purple Heart and undergoing two years of rehabilitative therapy and the amputation of his right forearm—including his painting hand—Treviño enrolled in San Antonio College, determined to learn how to draw and paint with his left hand. In 1974 he produced the impressive *La Historia Chicana*, a one hundred-foot-long work embracing six centuries of Mexican American heritage now on display inside the Sueltenfuss Library at Our Lady of the Lake University in San Antonio. Since then, Treviño has completed many more paintings and public artworks, including *Spirit of Healing*, the nine-story hand-cut tile mosaic that graces Christus Santa Rosa Children's Hospital in downtown San Antonio. His work has been collected by the Smithsonian American Art Museum, the Lyndon Baines Johnson Library and Museum, and the San Antonio Museum of Art. Anthony Head's sensitive and elegant biography now offers readers an intimate view of the artist's life. Head captures Treviño's determination, artistic vision, and the deep pride in his Chicano heritage that he transmits to the world through his creations. *Spirit: The Life and Art of Jesse Treviño* promises to engage and inspire readers with its vivid portrayal of this triumph of art and the human spirit.

Stanley's Dream Jacalyn Duffin, 2019-08-30 In 1964-65, an international team of thirty-eight scientists and assistants, led by Montreal physician Stanley Skoryna, sailed to the mysterious Rapa Nui (Easter Island) to conduct an unprecedented survey of its biosphere. Born of Cold War concerns about pollution, overpopulation, and conflict, and initially conceived as the first of two trips, the project was designed to document the island's status before a proposed airport would link the one thousand people living in humanity's remotest community to the rest of the world - its germs, genes, culture, and economy. Based on archival papers, diaries, photographs, and interviews with nearly twenty members of the original team, *Stanley's Dream* sets the expedition in its global context within the early days of ecological research and the understudied International Biological Program. Jacalyn Duffin traces the origins, the voyage, the often-complicated life within the constructed camp, the scientific preoccupations, the role of women, the resultant reports, films, and publications, and the previously unrecognized accomplishments of the project, including a goodwill tour of South America, the delivery of vaccines, and the discovery of a wonder drug. For Rapa Nui, the expedition coincided with its rebellion against the colonizing Chilean

military, resulting in its first democratic election. For Canada, it reflected national optimism as the country prepared for its centennial and adopted its own flag. Ending with Duffin's own journey to the island to uncover the legacy of the study and the impact of the airport, and to elicit local memories, Stanley's Dream is an entertaining and poignant account of a long-forgotten but important Canadian-led international expedition.

Travellers can hike the Andes, savour fine and affordable wine, and venture off shore to sail and kayak. This guide details every aspect of travel, from accommodation and eating out to national parks and sailing, in this most easy of Latin American countries for independent travellers.

Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATerre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

Felicidad organizacional: cuando el camino son las personas Rodrigo Rojas Foncillas,2023-01-01 El compromiso de los trabajadores está en juego. Gestionar los espacios emocionales será el factor de éxito y sostenibilidad de las empresas. Generar condiciones laborales para que los trabajadores estén felices será una ventaja superior, excepcional.
